

## THE CAPTIVE GODARD BALLOON

One of the novel attractions to the Exhibition was the possibility to ascend 500 m above the Exhibition site in the basket of a tethered hydrogen-filled Godard balloon. The location for the balloon was at the end of the Andrássy utca, near the main entrance to the Exhibition site. This meant that for the sum of 1 korona (50 krajczár) visitors were treated to a view over both the Exhibition and the city.
