

9.10 PARCELS - FOREIGN - THE ‘M-SACK’, 2002-2024

Following the abandonment of the ‘small packet’, from 01.06.2002 it appears that this separate class of mail was probably subsumed into non-standard letter rates. Instead, the ‘M-sack’ appears in the publicly available foreign letter rate tables. This class of mail appears to be for up to 5 kg, plus an additional charge per kg above 5 kg for both non-urgent and urgent transmission. Not much is known about the conditions of operation. This service disappeared from the 01.01.2025 public rates sheet. The rates are as follows
