

9.6 PARCELS – INLAND RATES - 1946 -2025

9.6.1 1946-1985

Inland parcel rates since 1946 have undergone a number of changes to reflect the times. The data in this section have been collated from a number of sources, including the ‘Black Book’, *Postatariffák* documents and public postal rate documents published by Magyar Posta.

9.6.2 Parcel stamps

From 17.12.1953, an earlier 1.40 Ft definitive stamp was surcharged 1.70 Ft, 2 Ft and 3 Ft for use on parcels. The note in the ‘Black Book’ states that:

“They were not sold, they were used exclusively for internal use. In case of multiple-stamp exemption, only one stamp can be purchased. All additional stamps are subject to 50% discount.”

Monografiája Vol. 5 pp.761-2 states: “As we mentioned when discussing the circulation period of the "1946 Forint-fíllér" series, the 1.40 Ft stamp of the series was finally withdrawn from circulation by the post office with the decree 7619/B-154/8. A. on November 30, 1953. This stamp was overprinted with the value of 1.70, 2 and 3 Forints and was used for the Christmas parcel traffic, which is the peak traffic of the post office every year.

Below we quote the decree 7619/B-154/2/8. A (Po. É. 1953/52. no.) that issued the stamps: “The stamps are used by post offices, in particular, for the clearance of parcels (delivery letters) and for the deduction of fees on internal handling documents They can be used from December 17, 1953.”

Since the stamps were not sold by post, and their purpose was limited to the deduction of parcel delivery fees or internal use, these stamps must be considered parcel stamps, and therefore cannot be classified as general circulation stamps. They were not sold to the public. It was used in postal administration. ‘Organised collectors could claim unused sets at face value through their associations.’

The surcharged issue was put into circulation by Decree No. 7619/B-154/2/8 A. ez. (Po. É. 1953/52. az.) on December 17, 1953, and were withdrawn from circulation by 7619/B-12/8. A. ez. by decree (Po. E. 1954/4. no.) of 25 January 1954. Exactly how they were used and what the exact rates at that time were are not clear.

In contrast, the eight parcel stamps of the inflationary issues of 1946 bore this designation only in their names, their use for this purpose was limited to a few days, and then they became general use in accordance with the postal regulations.

9.6.3 Parcels – Inland rate – Staff parcels – 1949-1995

Although it previously existed before and during WWII, and probably through the Hyperinflation period, from 01.01.1949, the discounted rates that postal personnel were entitled to for sending parcels was more formally defined. According to Hodobay, they were entitled to use this service for up to four times per year. The rate was a flat 40 *fillér*. Special parcel cards (normal and COD) were specifically issued for this purpose which, in addition to a tax imprint of 30 *f*, had a postage stamp imprint or a box containing text reading ‘40 *fillér postadíj leróva*’. The cards are headed *Személyzeti Szállítólevél* while the conventional public-use cards are simply headed *Szállítólevél*. See: Hodobay’s postal stationery catalogue [1] for more details of the cards.
